Step 3

Remove the protection film from the 2-sided tape on the rear of the HIKE IT X9 and attach to a suitable and clear position on your dash.

Step 4

Plug the Throttle Inhibitor Cable into the HIKE IT X9 Throttle Tuner as per Diagram 7 and 8.

4. Important - Please Read

- As an install guide, please refer to the rear of the HIKE IT throttle tuner plug for the name of your vehicle's plug, the following please ensure they are located in the correct location on the engine bay.
- After installing the HIKE IT, please start the engine in within the hour of the "New Car" period.
- If the plug has been installed incorrectly, it may cause your vehicle's engine light warning to display. In this instance please don't worry as the HIKE IT has an error self-detection system which will display "Error" on the HIKE IT display. If this happens please switch the engine off and wait two minutes for the protection circuit to reset and to be recalibrated. After two minutes reconnect the HIKE IT and restart your vehicle. If the engine light still displays please consult your vehicle's handbook or refer to the back cover.

5. Operating the HIKE IT

- The HIKE IT can be operated by the three buttons on the display which are MODE, DOWN and UP.
- The system can be adjusted after powering on but please only adjust when it is in idle.
- Press the Mode key to display the different mode settings as follows:
 - CO - Cruise mode (SP - Sport mode) HIKE IT Racing mode (HI - HIKE IT mode) OFF - Original vehicle mode (EC - Economy mode) Over Take mode (AU - Auto IQ mode)
- The Down and Up keys are for adjusting and adding either a mode to a list or deleting a mode from the response and identifying a mode. When the selection of HIKE IT mode, CO, HI, AU, OFF and EC is selected, it will indicate the mode on the display.
- To adjust between Manual and Auto (Automatic), press the +/- buttons for 3 seconds.

CO - Cruise Mode

Increase the maximum rate of the throttle for use for smooth acceleration using Cruise mode. Adjust from 0 (no throttle) to 100%.

HI - HIKE IT Racing mode

Transform the fuel of your vehicle by naturally reducing your throttle responsiveness and giving a high performance vehicle feeling. Adjust from 0 (no throttle) to 100%.

OFF - Original Vehicle mode

Returning CO or HIKE IT will automatically switch off any effect the HIKE IT has on your vehicle and return to normal.

SP - Sport Mode

Increase your vehicle's maximum acceleration and cornering ability to enhance the suspension acceleration effect. Adjust from 0 (no throttle) to 100%.

AU - Auto IQ mode

Locking the HIKE IT will give you permission to be taken the throttle lock during racing mode and saving operation to your maximum energy situation.

EC - 4x4 / Economy mode

Select EC mode when making the brake track or looking to reduce your fuel consumption by 10%.

Jump into Over take mode

If a setting has been changed for 5 seconds just push the MODE button and jump straight into HIKE IT.

Selecting Auto/Manual Transmission

Throttle response from an Auto IQ is using the Fuel of Manual IQ's which lets you use either the HIKE IT's response or your transmission. Adjust to Manual IQ by holding the +/- buttons for 3 seconds it will indicate HIKE IT is Manual. Similarly hold the +/- buttons for 3 seconds it will indicate HIKE IT is Auto.

Ambient Light Sensor

The brightness of the HIKE IT display will automatically adjust down when surrounding are dark, and the brightness will adjust up when surrounding are bright.
